

- ▶ Turn **lights off** every time you leave the room
- ▶ Turn all power devices and switches off when not in use
- ▶ Set computer preferences to maximum power saving
- ▶ School night study: use as few rooms as is necessary
- ▶ Use as few outside lights as is necessary
- ▶ Where convenient do electrical activity in the daytime, such as photocopying, printing and charging
- ▶ If possible purchase laptops rather than desktop computers. Also, photocopier as small as will meet your needs
- ▶ In teachers' quarters, do not use electric cook tops, air conditioners, kettles and other heavy load devices. They reduce capacity of the system for the school and other teachers
- ▶ No one is allowed to change any settings or tamper with the solar equipment, breakers or electrical system
- ▶ No power cords are allowed to private homes outside the school grounds. It steals opportunities from the school! ONLY the school and teachers have access to the power
